

Geometry & Measurement Student Activity

Angles and Lines 1

This worksheet reviews the material covering lines and angles you need to know from Gr. 6 math. Use these questions to test your understanding.

1. Mark the following lines as parallel, perpendicular or neither.

2. Draw the following.

a) a right angle

b) an obtuse angle

c) an acute angle

3. Use a marker or coloured pencil to outline 2 of each of the following angles. 2 right, 2 obtuse, 2 acute

4. Identify the kinds of angles seen in this image.

5. Draw a 45° angle and label the points ABC.

6. Draw 2 more angles. They should be twice and three times the size of the angle in question 5. Label the angles.
