

Podcasting – Recording Your Session

- Start Audacity
- Put on the Logitech USB headset and connect it to your laptop.
- Identify the four main buttons on the Audacity window... Play, Record, Pause and Stop

- When you press record, wait a brief second and then begin “talking”
- Audacity will record your session. An Audio Track appears.

- When you are satisfied with your recording, you should save.
- Select File → Save Project As.
- Choose where you want to save the project and give it a name.
- Suggestion – you may want to have a folder for your Podcasting sessions.
